

# Aboveground GRP tanks

Repsa aboveground GRP tanks are capable of working in multiple applications, as they offer excellent mechanical and corrosion resistance, which makes them extremely durable.

They can be used for storage from food products to extremely corrosive fluids, making them an excellent choice for chemical, food or steel plants.

## Applications

- Steel, chemical, food, pharmaceutical or automotive plants.
- Oil & Gas

## Features

- UV high resistance.
- 100% built with materials completely inert to corrosion.
- Low weight (approximately 50-75% lighter than a same capacity carbon steel tank).
- Easy maneuverability for assembly.
- High structural mechanical resistance.
- Up to 47,500 gal of capacity.

## Storage tanks

CILÍNDRICO	FEATURES	CAPACITY		DIAMETER	
		GAL.		FT.	
Vertical	Flat bottom	264 - 47551		2.62/3.11/3.28/3.93/4.75/ 5.25/5.74/6.56/7.54/8.20/ 9.84/11.48/13.12/14.76	
Vertical	torispherical/ conical bottom	264 - 21134		2.62/3.11/3.28/3.93/4.75/ 5.25/5.74/6.56/7.54/ 8.20/9.84	
Horizontal	Torispherical head	264 - 21134		2.62/3.11/3.28/3.93/4.75/ 5.25/5.74/6.56/7.54/ 8.20/9.84	

## Transport tanks
